

Technology Stack

Date	09 july 2026
Team ID	SWTID-2026-5556
Project Name	Credit Card Approval Prediction
Maximum Marks	2 Marks

Define Your Technology Stack:

Identify the programming languages, frameworks, databases, front-end tools, back-end tools, and APIs that you will use to build your solution. A well-chosen technology stack ensures that your application is scalable, maintainable, and aligned with your project requirements.

Fill out the table below to detail the specific technologies chosen for each component of your

S.No	Architecture Component / Layer	Technology Chosen	Justification / Purpose
1	Frontend / Client-Side	HTML5, CSS3, Bootstrap	User interface for entering credit card application details.

2	Backend / Server-Side	Python, Flask	Processes user requests and connects the ML model with the web application.
3	Database / Data Storage	CSV Dataset	Stores historical applicant data used for training and testing.
4	Cloud / Hosting / Deployment	Scikit-learn	Used to train and predict credit card approval.
5	Version Control & CI/CD	Pandas, NumPy	Cleans, preprocesses and analyzes the dataset.

6	Third-Party APIs / Other Tools	Visual Studio Code	Used to write, edit and debug project code.
